

Considerations for Introduction of New and Underutilized Vaccines

Table of Contents

Welcome

Chapter 1: How to [\[www\]](#) [\[pdf\]](#)

1. How to begin
2. Navigation through the module
3. What does this icon or symbol mean?
4. Frequently asked questions
5. Optimizing viewing
6. Help

Chapter 2: Acknowledgements [\[www\]](#) [\[pdf\]](#)

1. Japanese encephalitis: Credits and acknowledgements
2. Hepatitis B: Credits and acknowledgements

Japanese encephalitis

The disease

Chapter 1: Why is JE important? [\[www\]](#) [\[pdf\]](#)

Why is JE important?

Chapter 2: What is JE? [\[www\]](#) [\[pdf\]](#)

What is JE?

Activity: Multiple choice

Chapter 3: How is JE spread? [\[www\]](#) [\[pdf\]](#)

How is JE spread?

Activity: The transmission cycle of JE

Chapter 4: Where does JE occur? [\[www\]](#) [\[pdf\]](#)

Where does JE occur?

Chapter 5: Patterns of transmission [\[www\]](#) [\[pdf\]](#)

1. What is the pattern of JE transmission?
2. Epidemic seasonal peaks of transmission
3. Endemic year-round transmission

Chapter 6: Who is at risk? [\[www\]](#) [\[pdf\]](#)

1. Age
2. Infection of adults

3. Environmental factors
Activity: Multiple choice

Disease burden

Chapter 1: Health problem [\[www\]](#) [\[pdf\]](#)

To what extent is JE a public health problem?

Chapter 2: Needed data [\[www\]](#) [\[pdf\]](#)

1. What data are needed?
2. Surveillance for JE
3. Clinical case of acute encephalitis syndrome (AES)
4. Laboratory-confirmed case of JE
5. Sentinel sites
Activity: Multiple choice
6. Case study on syndromic surveillance: Thailand
7. Case study on syndromic surveillance: India

Chapter 3: Using data [\[www\]](#) [\[pdf\]](#)

1. How to analyze data
2. Calculating incidence rates
Activity:
3. Mapping data to identify high-risk areas
Activity: Create a Japanese encephalitis disease burden geographic distribution.
4. Seasonal patterns
Activity:
5. Age distribution of JE disease
Activity:
6. Gender distribution of JE disease
Activity:
7. Case study: Ranking high-risk areas in China

Control strategies

Chapter 1: Outbreak control [\[www\]](#) [\[pdf\]](#)

Outbreak control

Chapter 2: Human immunization [\[www\]](#) [\[pdf\]](#)

1. Human immunization: The best strategy for controlling JE
Activity: Multiple choice
2. Human immunization: A case study from Japan

Chapter 3: Mosquito control [\[www\]](#) [\[pdf\]](#)

1. Mosquito control
2. Case study: Mosquito control versus immunization in Thailand
Activity: evolution of JE control in Thailand

Chapter 4: Pig control [\[www\]](#) [\[pdf\]](#)

Pig control

Vaccine considerations

Chapter 1: The vaccines [\[www\]](#) [\[pdf\]](#)

1. Vaccine options

2. Inactivated mouse brain-derived JE vaccine
3. Live, attenuated (SA 14-14-2) JE vaccine
4. Live, attenuated (SA 14-14-2) JE vaccine: Nepal field trial
5. JE vaccine comparison
6. Future vaccine prospects

Chapter 2: Impact on disease [\[www\]](#) [\[pdf\]](#)

Assessing impact: How much disease will be prevented?

Chapter 3: Impact on programme [\[www\]](#) [\[pdf\]](#)

Vaccine impact on immunization programme

Chapter 4: Cost effectiveness [\[www\]](#) [\[pdf\]](#)

1. Cost-effectiveness of JE vaccine
2. Determining cost and health outcome measures
3. Case study: Cost-effectiveness study in China
4. Case study: How sensitive are the results from the China study?
5. Does the China study apply to your programme?
6. Case study: Cost benefit analysis in Thailand
7. Case study: Data used in Thailand
8. Case study: Results of analysis in Thailand

Chapter 5: Financial considerations [\[www\]](#) [\[pdf\]](#)

1. Financial considerations for introducing JE vaccine
2. Costing for JE vaccine introduction
3. JE vaccines
4. Estimate cost of vaccine introduction on the national immunization programme
5. Estimate total vaccine doses needed to introduce the new vaccine
6. Estimate total vaccine doses needed in subsequent years
7. Estimate cost of new vaccine needed in introduction and subsequent years
8. Tutorial: Comparing the cost of introducing different JE vaccines into your childhood immunization program
Activity: Introducing JE costing exercise
9. Syringe and other introduction costs
10. Estimate cost of syringes needed to introduce the new vaccine
11. Forecasting syringe needs after introduction
12. Projected costs, available resources, and the gap between them
13. Mobilizing resources to introduce JE vaccine
14. Planning for financial sustainability

Chapter 6: Cold chain capacity [\[www\]](#) [\[pdf\]](#)

1. Cold chain requirements
2. WHO Vaccine Volume Calculator
3. How to run the WHO Vaccine Volume Calculator
4. Tutorial: Using the WHO Vaccine Volume Calculator
5. Tutorial: Estimating impact of new vaccine schedule on cold chain capacity
6. Tutorial: Estimating impact of new vaccine schedule on each level of the cold chain
7. Step 1: Add up the net vaccine storage space (litres) at the desired temperature and at each storage facility in the cold chain

8. Step 2: Calculate the net storage space (litres) needed to accommodate the new routine childhood vaccine schedule
9. Step 3: See if there is adequate storage capacity to accommodate the new routine childhood schedule
10. Conclusion

Implement programme

Chapter 1: Immunization strategies [\[www\]](#) [\[pdf\]](#)

1. Immunization strategies
2. Routine childhood immunization
3. Introducing JE vaccine: Preventive campaign plus routine immunization
4. Mass campaigns
5. Case study: Combined strategy in China

Chapter 2: Schedule options [\[www\]](#) [\[pdf\]](#)

1. Immunization schedule: Inactivated mouse brain-derived JE vaccine
Activity: Multiple choice
2. Immunization schedule: Live, attenuated (SA 14-14-2) JE vaccine
3. Schedule and doses for travelers: Inactivated mouse brain-derived JE vaccine

Chapter 3: Procurement [\[www\]](#) [\[pdf\]](#)

1. Procurement
2. Estimating vaccine doses and other supplies
3. Multidose or single-dose vials
4. Procuring supplies

Chapter 4: Information systems [\[www\]](#) [\[pdf\]](#)

1. Introduction plan
2. Updating forms
3. Informational materials
4. Information systems

Chapter 5: Cold chain and vaccine management [\[www\]](#) [\[pdf\]](#)

1. Vaccine storage and handling
2. Preventing liquid mouse brain-derived JE vaccine from freezing
3. Minimizing vaccine wastage
4. WHO multidose vial policy

Chapter 6: Immunization safety [\[www\]](#) [\[pdf\]](#)

1. Immunization safety
2. Safe injection supplies and waste management
3. Adverse events for inactivated mouse brain-derived JE vaccine
4. Adverse events for live, attenuated (SA 14-14-2) JE vaccine
5. Surveillance systems

Chapter 7: Training and supervision [\[www\]](#) [\[pdf\]](#)

1. Training
2. Purposes of training
3. Improving the impact of training
4. Supportive supervision and follow-up

5. Implementing supportive supervision: Getting started
6. Content of training
7. Key facts: JE disease
8. Key facts: Inactivated mouse brain-derived JE vaccine
9. Key facts: Inactivated mouse brain-derived JE vaccine storage and administration
10. Key facts: Communicating with parents
11. Information, education and communication (IEC) materials

Chapter 8: Advocacy and communication[\[www\]](#)[\[pdf\]](#)

1. Advocating for Japanese encephalitis immunization
2. It is crucial to keep informed
3. Key messages for high-level officials
4. Community-level support for Japanese encephalitis vaccine
5. Why would people want JE vaccine?
6. Clearing up confusion about JE
7. Key messages in favor of JE immunization
8. Reaching the community to support JE immunization

Evaluate & monitor

Chapter 1: Immunization coverage[\[www\]](#)[\[pdf\]](#)

1. Monitoring immunization coverage
2. Administrative data
3. Coverage monitoring

Chapter 2: Disease incidence[\[www\]](#)[\[pdf\]](#)

Monitoring disease incidence

Resources

Chapter 1: JE resources[\[www\]](#)[\[pdf\]](#)

1. JE-specific resources
2. General resources for introducing new vaccines and immunization policy
3. Cost effectiveness and financial considerations
4. Implementing your programme: Procurement
5. Implementing your programme: Immunization safety
6. Implementing your programme: Cold chain and vaccine management
7. Implementing your programme: Training and supervision
8. Implementing your programme: Advocacy and communications
9. Evaluating and monitoring programme impact

Chapter 2: JE vaccine manufacturers[\[www\]](#)[\[pdf\]](#)

1. Manufacturers of live, attenuated JE (SA 14-14-2) vaccine
2. Manufacturers of inactivated mouse brain-derived JE vaccine

Chapter 3: Regional contacts[\[www\]](#)[\[pdf\]](#)

Regional contacts for Japanese encephalitis

Hepatitis B

The diseases

Chapter 1: Hepatitis B virus [\[www\]](#) [\[pdf\]](#)

1. The hepatitis B virus
2. Virus transmission
3. Geographic distribution

Chapter 2: Outcomes of HBV infection [\[www\]](#) [\[pdf\]](#)

1. Outcomes of HBV infection
Activity: Flash animation illustrating the different possible outcomes of HepB infection, largely depending on patient's age at infection
2. Age at infection
Activity: Flash animation showing the distribution of infections with symptomatic or chronic outcomes in variation with age at infection
3. Acute hepatitis B
Activity: Flash animation showing most common outcomes of symptomatic infection being resolved and immune, and fulminant hepatitis
4. Chronic HBV infection
Activity: Flash animation showing progression from asymptomatic infection of hepatitis B early in life to liver cancer and cirrhosis later in life, and risk of transmission throughout life
5. Liver cancer and cirrhosis
Activity: Multiple choice
6. Country example: The Gambia

Disease burden

Chapter 1: Global burden [\[www\]](#) [\[pdf\]](#)

Global disease burden

Chapter 2: Geographic patterns [\[www\]](#) [\[pdf\]](#)

Geographic patterns of hepatitis B disease burden

Chapter 3: National burden [\[www\]](#) [\[pdf\]](#)

Assessing national hepatitis B disease burden

Chapter 4: CDC disease burden model [\[www\]](#) [\[pdf\]](#)

1. The CDC Hepatitis B Disease Burden and Vaccination Model
2. How to run the CDC Hepatitis B Disease Burden and Vaccination Model
3. Tutorial: Using the CDC Hepatitis B Disease Burden and Vaccination Model
4. Tutorial: Setting the scene
5. Tutorial: Required data
6. Tutorial: Gathering data
7. Tutorial: Running the model
8. Tutorial: Using the model to estimate disease burden
9. Tutorial: Using the model to estimate vaccine impact

Assess vaccine

Chapter 1: The case for hepatitis B immunization [\[www\]](#) [\[pdf\]](#)

1. WHO immunization recommendation
2. The hepatitis B vaccine
3. Vaccine impact on immunization programme
4. Vaccine impact on reducing chronic HBV infections
5. Country example: Taiwan

6. Country example: India
7. Key points about hepatitis B vaccine

Chapter 2: Advocacy case study[\[www\]](#)[\[pdf\]](#)

1. Case study: Estimating reduction in HBV-related mortality with hepatitis B immunization using the CDC Hepatitis B Disease Burden Model
2. Case study: Setting the scene
3. Case study: Gathering data
4. Case study: Estimating disease burden
5. Case study: Estimating vaccine impact
6. Case study: The decision
7. Case study: Annexes

Chapter 3: Financial considerations[\[www\]](#)[\[pdf\]](#)

1. Financial considerations for introducing hepatitis B vaccine
2. Costing for hepatitis B vaccine introduction
3. Hepatitis B vaccine choices and prices
Activity: Chart showing change in prices over time of hepatitis B vaccine
4. UNICEF vaccine and immunization product guide
5. Estimate cost of vaccine introduction on the national immunization programme
6. Estimate total vaccine doses needed to introduce the new vaccine
7. Estimate total vaccine doses needed in subsequent years
8. Estimate cost of new vaccine needed in introduction and subsequent years
Activity: Fill in the blank
9. Syringe and other introduction costs
10. Estimate cost of syringes needed to introduce the new vaccine
11. Forecasting syringe needs after introduction
12. Projected costs, available resources, and the gap between them
13. Mobilizing resources to introduce hepatitis B vaccine
14. Planning for financial sustainability

Chapter 4: Cold chain capacity[\[www\]](#)[\[pdf\]](#)

1. Cold chain requirements
2. Assessing cold chain storage capacity
3. WHO Vaccine Volume Calculator
4. How to run the WHO Vaccine Volume Calculator
5. Tutorial: Using the WHO Vaccine Volume Calculator
6. Tutorial: Estimating impact of new vaccine schedule on cold chain capacity
7. Tutorial: Estimating impact of new vaccine schedule on each level of the cold chain
8. Step 1: Add up the net vaccine storage space at each storage facility
9. Step 2: Calculate the net storage space needed for the new routine childhood vaccine schedule
10. Step 3: See if there is adequate storage capacity for the new routine childhood schedule
11. Conclusion

Implement programme

Chapter 1: Vaccine options[\[www\]](#)[\[pdf\]](#)

1. Formulations of hepatitis B vaccines

2. Choosing vaccines
3. Monovalent versus combination vaccine

Chapter 2: Procurement[\[www\]](#)[\[pdf\]](#)

1. Procurement
2. Estimating vaccine doses and other supplies
3. Multidose or single-dose vials
4. Procuring supplies

Chapter 3: Immunization strategies[\[www\]](#)[\[pdf\]](#)

1. Strategies to control hepatitis B
2. Routine infant immunization
3. Administering a birth dose
4. Birth dose: Preventing perinatal transmission
5. Catch-up immunization
6. Catch-up in high-, intermediate- and low-endemicity countries

Activity: Multiple answer question

Chapter 4: Vaccine introduction[\[www\]](#)[\[pdf\]](#)

1. Vaccine phase-in: Routine infant immunization
2. Vaccine phase-in: Birth doses
3. Country example: Indonesia

Chapter 5: Schedule options[\[www\]](#)[\[pdf\]](#)

1. Vaccine schedules
Activity: Options for adding hepatitis B vaccine to immunization schedules
2. Country example: Vietnam
Activity: Question and answer

Chapter 6: Information systems[\[www\]](#)[\[pdf\]](#)

1. Vaccine introduction plan
2. Updating forms
3. Informational materials
4. Information systems

Chapter 7: Cold chain and vaccine management[\[www\]](#)[\[pdf\]](#)

1. Preventing vaccine from freezing
2. Effects of freezing on vaccine potency
3. Occurrence of freezing in vaccine cold chains
4. Protocol: Conducting a temperature monitoring study
5. Protocol: Determining where freezing occurs
6. Avoiding freezing during transport
7. Freezing during storage can be avoided
8. Monitoring temperature is important
9. Packaging and shipping
10. Minimizing vaccine wastage
11. WHO multidose vial policy
12. Removing hepatitis B vaccine from the cold chain
13. Country example: Indonesia

Chapter 8: Immunization safety[\[www\]](#)[\[pdf\]](#)

1. Immunization safety
2. Safe injection supplies and waste management
3. Hepatitis B vaccine injection safety
4. Adverse events following immunization
5. Hepatitis B safety and adverse events

Chapter 9: Training and supervision[\[www\]](#)[\[pdf\]](#)

1. Training and supervision
2. Purpose of training
3. Improving the impact of training
4. Supportive supervision and follow-up
5. Implementing supportive supervision: Getting started
6. Content of training
7. Key facts: Hepatitis B
8. Key facts: Hepatitis B vaccine
9. Key facts: Vaccine storage and waste disposal
10. Key facts: Vaccine administration
11. Key facts: Communicating with parents
12. Information, education and communication (IEC) materials

Chapter 10: Advocacy and communication[\[www\]](#)[\[pdf\]](#)

1. Continued advocacy with high-level officials
2. It is crucial to keep informed
3. Key messages for high-level officials
4. Community-level support for hepatitis B vaccine
5. Why should people want hepatitis B vaccine?
6. Clearing up confusion about hepatitis B
7. Key messages in favor of hepatitis B immunization
Activity: Multiple choice
8. Reaching the community to support hepatitis B immunization

Evaluate & monitor

Chapter 1: Evaluating impact[\[www\]](#)[\[pdf\]](#)

1. Evaluating the impact of hepatitis B immunization
2. Methods of evaluation
3. Serosurveys
4. Surveillance for acute hepatitis B disease
5. Cirrhosis and liver cancer morbidity and mortality

Chapter 2: Monitoring coverage[\[www\]](#)[\[pdf\]](#)

1. Monitoring immunization coverage
2. Administrative data
3. Using administrative data
4. Analyzing administrative data
5. Coverage surveys
6. EPI 30-cluster surveys, MICS and DHSs

7. Lot quality assurance survey (LQAS)
 8. Data quality audit (DQA)
 9. Country example: Kyrgyzstan
- Activity: Question and answer*

Resources

Chapter 1: Hepatitis B-specific [\[www\]](#) [\[pdf\]](#)

Hepatitis B-specific resources

Chapter 2: Vaccine introduction [\[www\]](#) [\[pdf\]](#)

General resources for introducing new vaccines and immunization policy

Chapter 3: Financial considerations [\[www\]](#) [\[pdf\]](#)

Cost effectiveness and financial considerations

Chapter 4: Implementing your programme [\[www\]](#) [\[pdf\]](#)

1. Procurement
2. Immunization safety
3. Cold chain and vaccine management
4. Training and supervision
5. Advocacy and communications

Chapter 5: Evaluating impact [\[www\]](#) [\[pdf\]](#)

Resources for evaluating & monitoring programme impact
